

% Facts

human(jason).

reads(jason).

wealthy(jason).

% Rule 1: All humans that are not impoverished and intelligent are happy

happy(X) :- human(X), \+ impoverished(X), intelligent(X).

% Rule 2: Humans that read are not stupid

\+ stupid(X) :- reads(X).

% Rule 3: Happy humans have exciting life

exciting_life(X) :- happy(X).

% --- Some assumptions ---

% Let's assume wealthy humans are not impoverished

\+ impoverished(X) :- wealthy(X).

% Let's assume humans that read are intelligent (otherwise we can't derive Jason's happiness)

intelligent(X) :- reads(X).

% Query example:

% ?- exciting_life(X).
